

Wall Mounted Unit - UX1

INVERTER FTXG-E / RXG-E

- State of the art design, with a sleek, compact and stylish outlook. Depth of only 15cm when in standby mode or switched off.
- **Inverter technology:** reduces the power consumption by up to 30% compared to non inverter units and ensures maximum comfort, low noise and reliability.
- **Movement sensor function:** if the room remains unoccupied for more than 20 minutes, the system automatically switches to the energy efficient mode. When people return into the room again, the system restores the original setting.
- **Night set mode:** prevents any sudden change in room temperature by gently raising/lowering the temperature before the system stops, so you can sleep more comfortably.
- **Powerful operation:** activates the maximum air volume for 20 minutes to cool or warm the room quickly.
- **Comfort mode:** guarantees draught free operation. When cooling, the flap is positioned horizontally to prevent cold air flow directly onto the body. When heating, the flap turns vertically down directing warm air to the bottom of the room.
- **Titanium apatite photocatalytic air purifying filter:** superior adsorption power. Besides mould and odours, it also adsorbs and decomposes bacteria and viruses for effective purification and deodorisation of the air inside the room.
- **Dry programme:** Daikin's special dry programme reduces humidity in the rooms without variations in internal temperature.
- **Quiet operation:** lowers the indoor/outdoor unit noise level by 3dB(A) by changing the frequency and fan speed.
- **Fan speed:** 5 fan speeds can be selected, high to super low.
- **Self diagnosis digital display:** in the unlikely event that an abnormality occurs, the LCD remote controller displays the error code allowing prompt maintenance.
- **Auto-restart function:** after a power failure in the building, the system automatically restarts to the setting in operation before the power failure.

Height	275mm
Width	840mm
Depth	150mm
